

Skin Fitness Plus **ORGANIC TOOTH POWDER**

WHY IT IS ESSENTIAL TO USE ORGANIC TOOTH POWDER:

- ◇ Teeth are not simply pieces of hard enamel, they are individual organs, each with blood, lymph drainage and nerve supply so they need the same thing that your ENTIRE body needs-HEALTHY, YOUTHFUL function! They need to be disinfected twice daily as does a skin wound but with CORRECT and HEALTHY!
- ◇ Each tooth is an organ with cells which are affected by hormones, vitamins, minerals, acid, alkaline, chemical toxins and your body's function, youthful/healthy or NOT. Each tooth has an important function.
- ◇ Unlike what most people think, teeth are porous so EVEN with your teeth you ARE what you eat and drink, FOOD IS YOUR MEDICINE AND the dental materials and exposure to natural light or removal from light with caps, impact SIGNIFICANTLY dental, SKIN, INTERNAL, hormonal and gut health by chemical toxins and bacteria, virus, fungal, parasite absorption/exposure.
- ◇ The dentine of EACH tooth contains millions of tubules that go from your mouth into the inner teeth and roots. It is through these tiny tubes that our saliva nourishes our teeth, and toxins, chemicals and infectious agents can be/ are absorbed into the tooth, its root, nerve, blood and lymphatic supply, never mind what the blood and lymphatic supply to each tooth exposes them to internally at the root level.
- ◇ Our saliva contains MANY minerals, enzymes, proteins and nutrients teeth need IF saliva is healthy. Our teeth are constantly bathed in our saliva which is why the internal environment of the body, acidity, alkalinity, toxicity, FURTHER is of UTMOST importance and why if you have radiation and your saliva glands are destroyed your teeth and gums rapidly decay. A detergent, toxic ingredient, chemical tooth and gum product along with un-healthy foods and lack of vitamins, minerals, hormones internally can destroy the natural components of our saliva and teeth, and make them weaker and unhealthy, thus the saliva will not be as effective as it should in protecting, repairing teeth and gums. If we have poor or toxic lymphatic and blood flow, our teeth INTERNALLY in EACH tooth organ are negatively impacted.
- ◇ Eating and dental products soften/etch away/weaken progressively the enamel, so it needs to be re-mineralized with SCIENTIFICALLY correct and HEALTHY ingredients and environment. Ingredients to AVOID are the same for teeth and gums as they are for skin and internal organs.
- ◇ Dental materials usually are made of toxic mercury, aluminum, barium, bis-phenol, plastics and chemicals, which are absorbed into the body via entry through the internal tooth/dentines, gut from swallowing and lungs from vaporization of the chemicals with negative side effects, so you ARE your teeth, dental material, gum and DENTAL health! Just like what you eat and put on your skin- LEARN TO ASK and READ the COMPLETE ingredient list of EVERYTHING that goes into your MOUTH and on/into your teeth, just as what goes INTO or ONTO your body to protect YOUR OPTIMAL health.
- ◇ As you develop into a baby before birth EACH tooth and organs develop together so each tooth is connected forever to specific organs in your body so if your TOOTH IS UNHEALTHY at ANY point in life then so is that organ, therefore anything that damages the health of the tooth, root canals, capping teeth, toxic dental materials CAN be the cause of organ dysfunction and even emotional/anxiety issues. When the tooth is then healthily repaired...YOU FEEL, LOOK and ARE better!

All these facts FURTHER instruct and support WHY the Body must be treated as a WHOLE - your entire body, including saliva, gums and teeth, inside and out, are BEST nourished/cared for/protected/maintained by BEST tools for the job, just as is your skin.

Skin Fitness Plus ORGANIC TOOTH POWDER

SKIN FITNESS PLUS Organic TOOTH Powder is made with dental, saliva, body, skin health **MAXIMAL** beneficial ingredients (special chemical form of Calcium Carbonate, Xylitol, **CORRECT** Sea Salt, selected herbs), which help the saliva optimally protect and nourish the teeth and gums.

This tooth powder does not foam, there is no soap nor detergent as with dental products with lauryl sulfates. It will **NOT** destroy the protective natural micro-organisms/healthy probiotics and the biology of our mouth as do the detergent/ingredients to avoid containing ones. Powder because requires no preservative and is **MAXIMAL** strength **EACH** time you use it vs. a liquid which loses strength due to oxidation.

Organic Tooth Powder PEPPERMINT, due to the herbs it contains has high antimicrobial effect helpful in healing mouth and gum issues. It is recommended for people with sensitive teeth and teeth/gum problems.

Ingredient Features:

- ◇ Calcium Carbonate provides a gentle cleaning. Calcium is also one of the main components of teeth and enamel and fills the dentine to help strengthen/repair/restore enamel.
- ◇ Xylitol encourages re-mineralization and helps bind and rid organisms particularly fungus, which promotes inflammation, plaque, periodontal disease, tooth decay, bad breath, white coating on the tongue and gum disease.
- ◇ Grey Sea Salt - it is the **BEST** source vs all other salts because **GREY** provides correct minerals and trace elements and is the correct and **MAXIMAL** strength chemical form to do so for the mouth, gums and teeth.
- ◇ It does **NOT** contain Glycerin which leaves a film on the teeth thus negatively impacting the enamel.

Instructions: Dip tooth brush covering top of brush with a thin layer. Brush normally 2-3 times a day.
