Julia T. Hunter M.D.

Why Wholistic Dermatology...

Addressing ALL the pieces of the body's puzzle is the only way to correctly and BEST achieve anti-aging, health, beauty and prevention. The skin is the largest organ of the body's orchestra of organs and a window to what is going on inside the body. I address the skin from within with the best, organ protecting, detoxifying, restoring to the telomere level, supplementation formulas, bio-identical, mimic nature for males AND females cream

hormones in uniquely penetrating, therapeutic yet healthy, non-toxic proprietary skin cream, so the entire body is working harmoniously, least challenged and most youthfully, to BEST and most quickly achieve MAXIMAL visible and physical healthiest results and solutions for quality longevity. The body is a factory that needs correct raw materials for the cells to construct, sustain, protect, restore, and rebuild.

From HEALTH comes beauty AND my side effect of creating beauty is health. Without health, in my medical experience, EVERYTHING you do to promote and preserve beauty and skin problem solutions, works 30-50% at best with lessened longevity of results. Without slowing as much as scientifically possible, internal aging and the inevitable resulting diseases, cosmetic goals are challenging to attain. MY goal in medicine has always been to identify the causes of the problem and attempt to cure, as much as scientifically possible, rather than just treat symptoms in perpetuity, but the true goal is no symptoms to treat. The body must be addressed as a whole, inside and out, utilizing best tools for the jobs to slow down and turn back the clock, optimizing anti-aging, health, beauty, and disease prevention.

The correct science behind healthy skin!

We choose our eco-correct, reliable, easy for use and travel, non-toxic containers because we believe in maximizing ingredients, not expensive packaging
